EDUCATION

Education	Institute	CGPA	Year
B.Tech., CSE-AIML	Sreyas Institute of Engineering and Technology, Hyderabad	6.28	July 2025
Diploma, Civil Engineering	Anurag Engineering college, Kodad	5.64	June 2022
Higher Education	Srujana High School, Suryapet	8.70	May 2019

EXPERIENCE

- Viswam AI

May 2025 - July 2025

AI-Developer Intern

Hyderabad, India

 - Contributed to India’s First Telugu LLM for inclusive India AI solutions with **Swecha**, **IIIT Hyderabad**, and **Meta**, developing the **Tune Buddy AI Chatbot** by integrating **Dify.ai** into a **Streamlit** app, and building **Craft Connect**, a Streamlit application connected to corpus APIs for cultural data collection.
 - Implemented a decoupled, full-stack application with Fast API and Streamlit to increase user accessibility by porting from a local-only to a live, public hosted environment on Render and Streamlit Cloud.
 - Designed a secure API gateway with Fast API and HTTPX, securing all backend logic and enhancing data integrity by ensuring user credentials and craft data where securely proxied to Swecha Corpus API.
- Intrainz

Oct 2024 - Dec 2024

Web Development Intern

Remote

 - Developed a responsive landing page for hotels and created a personal portfolio to showcase skills.
 - Built a functional calculator, E-Commerce and To-Do list webpages using HTML, CSS and JavaScript, demonstrating both creativity and technical proficiency.

PROJECTS

- Adaptive AI-SIEM for Evolving Cyber Threats Using Federated Learning

Jan 2025 - Jun 2025

Tools: Deep Learning (CNN, LSTM), Python, Federated Learning, Django, TF-IDF, HTML, CSS, JavaScript, Blockchain.

 - Designed an adaptive AI-SIEM(Security Information and Event Management) system for real-time cyber threat detection and false alert reduction.
 - Integrated Federated Learning, Blockchain and Edge Computing to enhance security, scalability, and privacy in IoT environments.
 - Evaluated deep learning models against traditional algorithms (SVM, Naive Bayes) on benchmark datasets (NSL-KDD, CICDS2017), achieving 99% accuracy and 0.01 False Positive Rate with the CNN model.
- Employing Deep Learning Paradigms for Fire and Smoke Detection

May 2024 - Dec 2024

Tools: Deep Learning, Computer Vision, Python, PyTorch, Twilio SMS API, YOLOv11 model.

 - Developed a real-time detection system for identifying fire and smoke in images and video feeds.
 - Implemented the **YOLOv11algorithm** for high-speed object detection, achieving **93.5% accuracy** and **60 FPS**.
 - Created a complete data pipeline, ensuring accurate localization and classification of safety threats and applied comparative evaluation metrics (mAP, F1-Score) to analyze model performance against baseline algorithms and other Yolo versions.

SKILLS

- Programming Languages** : Python, Java, JavaScript.
- Technologies** : Machine Learning, Deep Learning, Artificial Intelligence, HTML, CSS.
- Tools** : Streamlit.

CERTIFICATIONS

- Forage**, AWS APAC Solution Architecture Virtual Experience. Jan 2025
- Forage**, Tata Data Visualization Job Simulation. Jul 2025
- Forage**, Goldman Sachs Software Engineering Virtual Experience. Jul 2025
- J&T Tech Labs**, Full Stack Web Development Workshop Jul 2024
- IEEE Sreyas** , Machine Learning Workshop Dec 2023
- Innomatics Research Labs** , Machine Learning Workshop Nov 2025
